Subject Index of Volume 73

Acetic acid
and formic acid and pyridine: FT–IR study of adsorption of, on magnesia and molybdena–magnesia, 51
nitro and nitrato Pd complexes in oxidation processes: mechanism of formation of 1,1- and 1,2-addition products during ethylene oxidation in chloroform–acetic acid solution, 115
performance of Pd catalysts for aromatic oxidation in, 237
Acrylonitrile
selective dimerization of, affording methyleneglutaronitrile (2,4-dicyanobutene) catalysed by Ni(0) complexes in presence of phosphine, L15
Adsorption
FT–IR study of, of pyridine, formic acid and acetic acid on magnesia and molybdena–magnesia, 51
hydrogen: pulse-chromatographic N_2O titration of Cu surface area on Cu–ZnO–MeO_x catalysts in connection with their, 203
Alanine
and tartaric aicd; asymmetric hydrogenation of methylacetoacetate using Ni/SiO_2 modified with, 91
Alcaligenes eutrophus H16 hydrogenase
kinetics of catalysis by, of electrochemical reduction of NAD^+, 371
Alcohols
direct synthesis of, from n-olefins and syngas in liquid phase catalysed by Rh supported on crosslinked acrylic resins, 23
kinetics of rearrangement of 1,2-epoxycyclododecane and 1,2-epoxycyclododeca-*trans*-5,6-*cis*-9,10-diene catalysed by lithium bromide in presence of polyethylene glycol 400, 157
synthesis of binuclear complexes of Mn(II), Cr(III) and Fe(III) with 1,3-bis[1-(pyridin-2-yl)ethylideneamino]-propan-2-ol and study of their use as catalyst for epoxidation of alkenes, 287
Alkanes
kinetics of rearrangement of 1,2-epoxycyclododecane and 1,2-epoxycyclododeca-*trans*-5,6-*cis*-9,10-diene catalysed by lithium bromide in presence of polyethylene glycol 400, 157
photooxidation of saturated hydrocarbons through H_2O as source of O_2 catalysed by $[Ru^{III}(EDTA\text{-}H)Cl]^-$ complex in $Pt/TiO_2/RuO_2$ semiconductor particulate system, 265
selective oxidation of n-pentane and 2-pentene over $(VO)_2P_2O_7$: continuous-flow and transient studies at subatmospheric pressures, 353
Alkenes, Olefins
characterization of Cr/silica ethylene polymerization catalyst by TPO/TPR and FT–IR, 249
cluster stability studies, *in situ*, explored by cylindrical internal reflectance (CIR) spectroscopy: 1-pentene hydroformylation using phosphine-substituted $Co_4(CO)_8P_2(\mu_4\text{-}PPh)_2$ clusters, 181
comparative study of homogeneous catalytic activity of Group 8–9 metal compounds in hydroformylation of 1-hexene, 325
direct synthesis of alcohols from n-olefins and syngas in liquid phase catalysed by Rh supported on crosslinked acrylic resins, 23
effect of bulky ligands on hydrogenation of, catalysed by *cis*-$[MH_2(dcpe)_2]$ (M = Ru, Os: dcpe = 1,2-bis(dicyclohexylphosphino)-ethane), 147
efficient water-soluble catalyst, new, for two-phase hydroformylation of; water-soluble metal complexes and catalysts, 191
epoxidation of, with iodosylbenzene using mono- and binuclear Ru(III)–Schiff base complex catalysts, 277

hydroformylation and isomerization of hex-1-ene catalysed by [Rh(acac)(CO)(PPh_3)]: effect of modifying ligands, 1
kinetics of rearrangement of 1,2-epoxycyclododecane and 1,2-epoxycyclododeca-*trans*-5,6-*cis*-9,10-diene catalysed by lithium bromide in presence of polyethylene glycol 400, 157
nitro and nitrato Pd complexes in oxidation processes: mechanism of formation of 1,1- and 1,2-addition products during ethylene oxidation in chloroform–acetic acid solution, 115
olefin oligomerization with Ni P O chelate complexes, 271
Rh(I)-catalysed alternating co-oligomerization of CO with: synthetic and mechanistic studies, 297
selective dimerization of acrylonitrile affording methyleneglutaronitrile (2,4-dicyanobutene) catalysed by Ni(0) complexes in presence of phosphine, L15
selective oxidation of n-pentane and 2-pentene over $(VO)_2P_2O_7$: continuous-flow and transient studies at subatmospheric pressures, 353
synthesis of binuclear complexes of Mn(II), Cr(III) and Fe(III) with 1,3-bis[1-(pyridin-2-yl)ethylideneamino]-propan-2-ol and study of their use as catalyst for epoxidation of, 287

Alkylation reaction
phase-transfer catalysis in, of α-naphthol with epichlorohydrin, 9

Alkylisothiouronium salts
S-, as phase-transfer catalysts in *p*-xylene oxidation by oxygen, L11

Amines
selective catalytic reduction, novel, of aromatic nitro compounds affording, using Ru-carbonyl complex in presence of NEt_3 under CO/H_2O conditions, L1

Amino acids
asymmetric hydrogenation of methylacetoacetate using Ni/SiO_2 modified with tartatic acid and alanine, 91
metal ion and micellar triggering of enantioselectivity in hydrolysis of N-protected amino acid esters, L5
peptide synthesis by stabilized trypsin: industrial kinetic studies under extreme experimental conditions, 97

Aromatic compounds
cluster stability studies, *in situ*, explored by cylindrical internal reflectance (CIR) spectroscopy: 1-pentene hydroformylation using phosphine-substituted $Co_4(CO)_8P_2(\mu_4\text{-}PPh)_2$ clusters, 181
epoxidation of alkenes with iodosylbenzene using mono- and binuclear Ru(III)–Schiff base complex catalysts, 277
FT–IR study of adsorption of pyridine, formic acid and acetic acid on magnesia and molybdena–magnesia, 51
hydroformylation and isomerization of hex-1-ene catalysed by [Rh(acac)-(CO)(PPh_3)]: effect of modifying ligands, 1
Pd-catalysed formate–nitrobenzene–CO reaction: formation of carbamate ester, 167
performance of Pd catalysts for aromatic oxidation in acetic acid, 237
phase-transfer catalysis in alkylation reaction of α-naphthol with epichlorohydrin, 9
reductive dechlorination of aryl chlorides catalysed by Pd complexes containing basic, chelating phosphines, 173
S-alkylisothiouronium salts as phase-transfer catalysts in *p*-xylene oxidation by oxygen, L11
selective catalytic reduction, novel, of aromatic nitro compounds affording amines using Ru–carbonyl complex in presence of NEt_3 under CO/H_2O conditions, L1
stoichiometry of Pd-catalysed *N*,*N*′-diphenylurea synthesis from nitrobenzene, aniline and CO, 43
synthesis of binuclear complexes of Mn(II), Cr(III) and Fe(III) with 1,3-bis[1-(pyridin-2-yl)ethylideneamino]-propan-2-ol and study of their use as catalyst for epoxidation of alkenes, 287

Chloroform
nitro and nitrato Pd complexes in oxidation processes: mechanism of

formation of 1,1- and 1,2-addition products during ethylene oxidation in chloroform–acetic acid solution, 115
Chromium
characterization of Cr/silica ethylene polymerization catalyst by TPO/TPR and FT–IR, 249
synthesis of binuclear complexes of Mn(II), Cr(III) and Fe(III) with 1,3-bis[1-(pyridin-2-yl)ethylideneamino]-propan-2-ol and study of their use as catalyst for epoxidation of alkenes, 287
Clusters
catalytic hydrodesulphurization by supported bimetallic sulphide cluster catalysts, 335
stability studies, *in situ*, explored by cylindrical internal reflectance (CIR) spectroscopy: 1-pentene hydroformylation using phosphine-substituted $Co_4(CO)_8P_2(\mu_4\text{-}PPh)_2$ clusters, 181
CO
Pd-catalysed formate–nitrobenzene–CO reaction: formation of carbamate ester, 167
Rh(I)-catalysed alternating co-oligomerization of, with olefins: synthetic and mechanistic studies, 297
selective catalytic reduction, novel, of aromatic nitro compounds affording amines using Ru-carbonyl complex in presence of NEt_3 under CO/H_2O conditions, L1
stoichiometry of Pd-catalysed *N,N'*-diphenylurea synthesis from nitrobenzene, aniline and, 43
CO_2
photo-assisted catalytic reduction of, with pre-adsorbed ammonia on silica-supported iron, 225
Cobalt
in situ cluster stability studies explored by cylindrical internal reflectance (CIR) spectroscopy: 1-pentene hydroformylation using phosphine-substituted $Co_4(CO)_8P_2(\mu_4\text{-}PPh)_2$ clusters, 181
Copper
pulse-chromatographic N_2O titration of Cu surface area on Cu–ZnO–MeO_x catalysts in connection with their hydrogen adsorption, 203
Dimerization
selective, of acrylonitrile affording methyleneglutaronitrile (2,4-dicyanobutene) catalysed by Ni(0) complexes in presence of phosphine, L15
Epichlorohydrin
phase-transfer catalysis in alkylation reaction of α-naphthol with, 9
Epoxidation
of alkenes with iodosylbenzene using mono- and binuclear Ru(III)–Schiff base complex catalysts, 277
synthesis of binuclear complexes of Mn(II), Cr(III) and Fe(III) with 1,3-bis[1-(pyridin-2-yl)ethylideneamino]-propan-2-ol and study of their use as catalyst for, of alkenes, 287
Epoxy
kinetics of rearrangement of 1,2-epoxycyclododecane and 1,2-epoxycyclododeca-*trans*-5,6-*cis*-9,10-diene catalysed by lithium bromide in presence of polyethylene glycol 400, 157
Esters
asymmetric hydrogenation of methylacetoacetate using Ni/SiO_2 modified with tartaric acid and alanine, 91
metal ion and micellar triggering of enantioselectivity in hydrolysis of N-protected amino acid esters, L5
Pd-catalysed formate–nitrobenzene–CO reaction: formation of carbamate ester, 167
solid-state ^{31}P MAS NMR study of distribution and reaction of organophosphorus esters adsorbed on synthetic resin catalysts, 77
Formic acid
and pyridine and acetic acid; FT–IR study of adsorption of, on magnesia and molybdena–magnesia, 51
Group 8–9 metal compounds
comparative study of homogeneous catalytic activity of, in hydroformylation of 1-hexene, 325
Hydrazine
kinetics and mechanism of oxidation of, with dichlorotriaquoruthenium(V)–oxo complex in aqueous solution, 17

Hydrodesulphurization
catalytic, by supported bimetallic sulphide cluster catalysts, 335
thiophene: molecular-orbital picture of; catalyst activation process, 65
Hydroformylation
comparative study of homogeneous catalytic activity of Group 8–9 metal compounds in, of 1-hexene, 325
and isomerization of hex-1-ene catalysed by [Rh(acac)(CO)(PPh_3)]: effect of modifying ligands, 1
1-pentene, using phosphine-substituted $Co_4(CO)_8P_2(\mu_4\text{-}PPh)_2$ clusters; *in situ* cluster stability studies explored by cylindrical internal reflectance (CIR) spectroscopy, 181
two-phase: efficient water-soluble catalyst, new, for of olefins; water-soluble metal complexes and catalysts, 191
Hydrogenation
asymmetric, of methylacetoacetate using Ni/SiO_2 modified with tartatic acid and alanine, 91
effect of bulky ligands on, of olefins catalysed by *cis*-[MH_2(dcpe)$_2$] (M = Ru, Os; dcpe = 1,2-bis(dicyclohexylphosphino)ethane), 147
Hydrolysis
metal ion and micellar triggering of enantioselectivity in, of N-protected amino acid esters, L5

Iron
photo-assisted catalytic reduction of CO_2 with pre-adsorbed ammonia on silica-supported iron, 225
synthesis of binuclear complexes of Mn(II), Cr(III) and Fe(III) with 1,3-bis[1-(pyridin-2-yl)ethylideneamino]-propan-2-ol and study of their use as catalyst for epoxidation of alkenes, 287
Isomerization
and hydroformylation of hex-1-ene catalysed by [Rh(acac)(CO)(PPh_3)]: effect of modifying ligands, 1

Lithium bromide
kinetics of rearrangement of 1,2-epoxycyclododecane and 1,2-epoxycyclododecane-*trans*-5,6-*cis*-9,10-diene catalysed by, in presence of polyethylene glycol 400, 157

Magnesia
FT–IR study of adsorption of pyridine, formic acid and acetic acid on magnesia and molybdena–magnesia, 51
Manganese
synthesis of binuclear complexes of Mn(II), Cr(III) and Fe(III) with 1,3-bis[1-(pyridine-2-yl)ethylideneamino]-propan-2-ol and study of their use as catalyst for epoxidation of alkenes, 287
Metal ion and micellar triggering
of enantioselectivity in hydrolysis of N-protected amino acid esters, L5
Methanol dehydrogenase
purification and characterization of, from *Methylosinus trichosporium* (*OB3b*), 381
Methyleneglytaronitrile (2,4-dicyanobutene)
selective dimerization of acrylonitrile affording, catalysed by Ni(0) complexes in presence of phosphine, L15
Methylosinus trichosporium (*OB3b*)
purification and characterization of methanol dehydrogenase from, 381
Molecular-orbital picture
of thiophene hydrodesulphurization; catalyst activation process, 65
Molybdenum
FT–IR study of adsorption of pyridine, formic acid and acetic acid on magnesia and molybdena–magnesia, 51

Nickel
asymmetric hydrogenation of methylacetoacetate using Ni/SiO_2 modified with tartaric acid and alanine, 91
olefin oligomerization with Ni P⌒O chelate complexes, 271
selective dimerization of acrylonitrile affording methyleneglutaronitrile (2,4-dicyanobutene) catalysed by Ni(0) complexes in presence of phosphine, L15

Olefins: see Alkenes
Oligomerization
olefin, with Ni P⌒O chelate complexes, 271
Rh(I)-catalysed alternating co-oligomerization, of CO with olefins: synthetic and mechanistic studies, 297

Osmium
effect of bulky ligands on hydrogenation of olefins catalysed by *cis*-[$MH_2(dcpe)_2$] (M = Ru, Os; dcpe = 1,2-bis(dicyclohexyl-phosphino)-ethane), 147
Oxidation
aromatic; performance of Pd catalysts for, in acetic acid, 237
kinetics and mechanism of, of hydrazine with dichlorotriaquoruthenium(V)–oxo complex in aqueous solution, 17
nitro and nitrato Pd complexes in oxidation processes: mechanism of formation of 1,1- and 1,2-addition products during ethylene oxidation in chloroform–acetic acid solution, 115
selective, of n-pentane and 2-pentene over $(VO)_2P_2O_7$: continuous-flow and transient studies at subatmospheric pressures, 353
p-xylene: S-alkylisothiouronium salts as phase-transfer catalysts in, by oxygen, L11
Oxygen
S-alkylisothiouronium salts as phase-transfer catalysts in *p*-xylene oxidation by, L11

Palladium
-catalysed formate–nitrobenzene–CO reaction: formation of carbamate ester, 167
nitro and nitrato Pd complexes in oxidation processes: mechanism of formation of 1,1- and 1,2-addition products during ethylene oxidation in chloroform–acetic acid solution, 115
performance of Pd catalysts for aromatic oxidation in acetic acid, 237
reductive dechlorination of aryl chlorides catalysed by Pd complexes containing basic, chelating phosphines, 173
stoichiometry of Pd-catalysed *N,N'*-diphenylurea synthesis from nitrobenzene, aniline and CO, 43
Peptide
synthesis by stabilized trypsin: industrial kinetic studies under extreme experimental conditions, 97
Phosphorus
in situ cluster stability studies explored by cylindrical internal reflectance (CIR) spectroscopy: 1-pentene hydroformylation using phosphine-substituted $Co_4(CO)_8P_2(\mu_4\text{-}PPh)_2$ clusters, 181
olefin oligomerization with Ni P O chelate complexes, 271
reductive dechlorination of aryl chlorides catalysed by Pd complexes containing basic, chelating phosphines, 173
selective dimerization of acrylonitrile affording methyleneglutaronitrile (2,4-dicyanobutene) catalysed by Ni(0) complexes in presence of phosphine, L15
selective oxidation of n-pentane and 2-pentene over $(VO)_2P_2O_7$: continuous-flow and transient studies at subatmospheric pressures, 353
solid-state ^{31}P MAS NMR study of distribution and reaction of organophosphorus esters adsorbed on synthetic resin catalysts, 77
Photo-oxidation
of saturated hydrocarbons through H_2O as source of O_2 catalysed by $[Ru^{III}(EDTA\text{-}H)Cl]^-$ complex in $Pt/TiO_2/RuO_2$ semiconductor particulate system, 265
Platinum
photo-oxidation of saturated hydrocarbons through H_2O as source of O_2 catalysed by $[Ru^{III}(EDTA\text{-}H)Cl]^-$ complex in $Pt/TiO_2/RuO_2$ semiconductor particulate system, 265
Polyethylene glycol 400
kinetics of rearrangement of 1,2-epoxycyclododecane and 1,2-epoxycyclododeca-*trans*-5,6-*cis*-9,10-diene catalysed by lithium bromide in presence of, 157
Polymerization
Cr/silica ethylene, catalyst by TPO/TPR and FT–IR; characterization of, 249
Pulse-chromatographic N_2O titration
of Cu surface area on Cu–ZnO–MeO_x catalysts in connection with their hydrogen adsorption, 203

Reduction
electrochemical; kinetics of catalysis by

Alcaligenes eutrophus H16 hydrogenase of, of NAD^+, 371
photo-assisted catalytic, of CO_2 with pre-adsorbed ammonia on silica-supported iron, 225
selective catalytic, novel, of aromatic nitro compounds affording amines using Ru–carbonyl complex in presence of NEt_3 under CO/H_2O conditions, L1
Reductive dechlorination
of aryl chlorides catalysed by Pd complexes containing basic, chelating phosphines, 173
Resins
crosslinked acrylic; direct synthesis of alcohols from n-olefins and syngas in liquid phase catalysed by Rh supported on, 23
solid-state ^{31}P MAS NMR study of distribution and reaction of organophosphorus esters adsorbed on synthetic resin catalysts, 77
Rhodium
direct synthesis of alcohols from n-olefins and syngas in liquid phase catalysed by, supported on crosslinked acrylic resins, 23
hydroformylation and isomerization of hex-1-ene catalysed by $[Rh(acac)(CO)(PPh_3)]$: effect of modifying ligands, 1
Rh(I)-catalysed alternating co-oligomerization of CO with olefins: synthetic and mechanistic studies, 297
Ruthenium
effect of bulky ligands on hydrogenation of olefins catalysed by *cis*-$[MH_2(dcpe)_2]$ (M = Ru, Os; dcpe = 1,2-bis(dicyclohexylphosphino)-ethane), 147
epoxidation of alkenes with iodosylbenzene using mono- and binuclear Ru(III)–Schiff base complex catalysts, 277
kinetics and mechanism of oxidation of hydrazine with dichlorotriaquoruthenium(V)–oxo complex in aqueous solution, 17
photo-oxidation of saturated hydrocarbons through H_2O as source of O_2 catalysed by $[Ru^{III}(EDTA\text{-}H)Cl]^-$ complex in $Pt/TiO_2/RuO_2$ semiconductor particulate system, 265
selective catalytic reduction, novel, of aromatic nitro compounds affording amines using Ru–carbonyl complex in presence of NEt_3 under CO/H_2O conditions, L1

Schiff base
epoxidation of alkenes with iodosylbenzene using mono- and binuclear Ru(III)–Schiff base complex catalysts, 277
Semiconductor
photo-oxidation of saturated hydrocarbons through H_2O as source of O_2 catalysed by $[Ru^{III}(EDTA\text{-}H)Cl]^-$ complex in $Pt/TiO_2/RuO_2$ semiconductor particulate system, 265
Silicon
asymmetric hydrogenation of methylacetoacetate using Ni/SiO_2 modified with tartaric acid and alanine, 91
characterization of Cr/silica ethylene polymerization catalyst by TPO/TPR and FT–IR, 249
functionalization of silica and its use as catalyst: application of modified silica for several nucleophilic reactions, 215
photo-assisted catalytic reduction of CO_2 with pre-adsorbed ammonia on silica-supported iron, 225
Spectroscopy
characterization of Cr/silica ethylene polymerization catalyst by TPO/TPR and FT–IR, 249
cluster stability studies, *in situ*, explored by cylindrical internal reflectance (CIR) spectroscopy: 1-pentene hydroformylation using phosphine-substituted $Co_4(CO)_8P_2(\mu_4\text{-}PPh)_2$ clusters, 181
FT–IR study of adsorption of pyridine, formic acid and acetic acid on magnesia and molybdena–magnesia, 51
solid-state ^{31}P MAS NMR study of distribution and reaction of organophosphorus esters adsorbed on synthetic resin catalysts, 77
Sulphur
catalytic hydrodesulphurization by supported bimetallic sulphide cluster catalysts, 335
molecular-orbital picture of thiophene hydrodesulphurization; catalyst activation process, 65

S-alkylisothiouronium salts as phase-transfer catalysts in *p*-xylene oxidation by oxygen, L11
Surface
pulse-chromatographic N_2O titration of Cu surface area on Cu–ZnO–MeO_x catalysts in connection with their hydrogen adsorption, 203
Syngas
direct synthesis of alcohols from n-olefins and syngas in liquid phase catalysed by Rh supported on cross-linked acrylic resins, 23

Tartaric acid
and alanine; asymmetric hydrogenation of methylacetoacetate using Ni/SiO_2 modified with, 91
Titanium
photo-oxidation of saturated hydrocarbons through H_2O as source of O_2 catalysed by $[Ru^{III}(EDTA\text{-}H)Cl]^-$ complex in $Pt/TiO_2/RuO_2$ semiconductor particulate system, 265
Trypsin
peptide synthesis by stabilized trypsin: industrial kinetic studies under extreme experimental conditions, 97

Urea
stoichiometry of Pd-catalysed *N,N'*-diphenylurea synthesis from nitrobenzene, aniline and CO, 43

Vanadium
selective oxidation of n-pentane and 2-pentene over $(VO)_2P_2O_7$: continuous-flow and transient studies at subatmospheric pressures, 353

Water
photooxidation of saturated hydrocarbons through, as source of O_2 catalysed by $[Ru^{III}(EDTA\text{-}H)Cl]^-$ complex in $Pt/TiO_2/RuO_2$ semiconductor particulate system, 265
selective catalytic reduction, novel, of aromatic nitro compounds affording amines using Ru–carbonyl complex in presence of NEt_3 under CO/H_2O conditions, L1
-soluble metal complexes and catalysts: new, efficient water-soluble catalyst for two-phase hydroformylation of olefins, 191

Zinc
pulse-chromatographic N_2O titration of Cu surface area on Cu–ZnO–MeO_x catalysts in connection with their hydrogen adsorption, 203
